

Case Study: UOB Plaza, Singapore

Client: United Overseas Bank Ltd

Project

The UOB Plaza is the headquarters for Singapore's prime financial institution, the United Overseas Bank Ltd. Designed by renowned architect Kenzo Tange Associates, UOB Plaza stands at 280m high and is one of the three tallest buildings in Singapore. It is located at Raffles Place, the Central Business District and overlooks the Singapore River. UOB Plaza is a highly acclaimed prime commercial development in Singapore.

Our role

Rider Levett Bucknall Singapore provided full Quantity Surveying services on this major project, from project inception to the final account stage

Client benefits

Rider Levett Bucknall Singapore provided comprehensive cost consultancy services to the project comprising cost planning, change control, tender procurement, contract documentation, and post-contract services to keep project costs managed and within budget.

Testimonial

"With Rider Levett Bucknall Singapore, we adopted a very effective cost monitoring & control process to keep the entire development cost within budget. They advised and dealt with all the claims that were put forth by both the contractors and have completed the project without major disputes. They have acted professionally in all matters pertaining to the contractual claims and we really appreciate their support, effort and cooperation. Working with them on this project has been a great pleasure & terrific experience for us."
